PRESS RELEASE PRESS RELEASE

Xler8tr Announces Engagement with Leading Global Pharmaceutical Companies

Xler8tr has started engagement with leading global pharmaceutical companies it was announced today.

Xler8tr is now engaged with a number of External Innovations departments as well as VC arms of major pharmaceutical and life sciences enterprise and anticipate launching their first course with places for up to 20 projects in the last quarter of 2017

Anthony Silver of Xler8tr said

“After the test marketing at the beginning of this year, we had high expectations about the response we were likely to receive on launch. In fact the response has been more positive than we had anticipated.”

About Xler8tr

The Cambridge based pharmaceutical / life sciences accelerator with strategic partnerships with leading global advisory businesses advances the commercials of very early stage (pre POC) science through incorporation creating independent and transportable IT, legal and management accounting infrastructure vested with IP. Xler8tr creates a digital presence and initial branding. At the end of the 6 month course prospects articulate their commercialisation plans with supporting data room to attract next stage dilutive and non-dilutive funding.
